

CLIPS

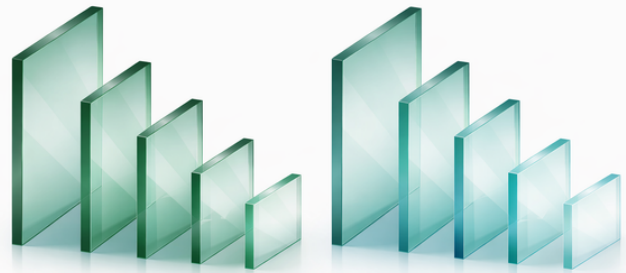

CHANNEL

CLIPS VS CHANNEL

Upgrading from our standard channel to utilizing clips to fasten fixed panels can create a completely unique final product

CLEAR VS ULTRA CLEAR

- Visually clearer glass
- Iron in glass creates a “Coke-bottle” effect causing the Dark Green hue. Low-Iron glass has less iron than traditional glass drastically reducing the green hue, but not completely removing it on larger or thicker glass panels.
- You may still notice a slight blue/green hue, although it will be significantly more clear than traditional clear glass

TRADITIONAL CLEAR

ULTRA CLEAR

- Image reflects color accumulation from small (roughly 12”) panels up to large (roughly 100”) panels

Sample showing clear glass and low-iron being installed side by side

ULTRA CLEAR

HANDLE UPGRADES

- Truly personalize your shower by choosing a handle that resonates with you
- Don't see your preferred handle? Send us an example for us to best match to our wide selection
- Knobs are available as well

VINYL KIT

- Typically clear vinyl installed around the door perimeter to seal the shower better than a traditional frameless design.
- Occasionally uses a metal dam along the bottom of the door for thresholds sloped backwards to stop water from leaking
- Mainly used for steam showers
- Not recommended on doors other than steam units as adding vinyl introduces additional wear items that would need replaced periodically
- Does NOT include a door sweep as door sweeps are included on all swinging shower doors

VINYL EXTRUSIONS

GLASS PROTECTANT

GLASS PROTECTANT

- Our standard glass protectant has a lifetime manufacturer's warranty
- Register the warranty after the enclosure is installed using the supplied form
- We also offer a fused / baked in variation that holds up better to wear and has a more extensive lifetime warranty.
- Does NOT require regular re-application
